PROFESSIONAL SUMMARY

- Senior Angular Developer with 6+ years of experience building scalable enterprise web applications using Angular (v6–18), TypeScript, RxJS, and REST APIs.
- Experienced in developing reusable component architectures, optimizing application performance, and delivering responsive UI solutions for large-scale business applications.
- Strong expertise in Angular Material, state management, reactive programming, API integration, and Agile/Scrum development environments.
- Worked extensively on enterprise-grade applications with focus on maintainability, performance optimization, code reusability, and clean architecture.
- Recently took a planned career break due to family responsibilities and personal commitments, and now actively seeking full-time opportunities to contribute with strong frontend engineering expertise.

TECHNICAL SKILLS

- **Frontend:** Angular (v6–18), TypeScript, JavaScript, HTML5, CSS3, Bootstrap, Material
- **State Management & Reactive Programming:** RxJs, Observables and Reactive Forms
- **API & Backend Integration:** RESTful APIs, JSON, HTTP Interceptors, Authentication & Authorization.
- **Tools & Development:** Git, GitHub, npm, Webpack, VS Code
- **Development Practices:** Reusable Component Architecture, Responsive Web Design, Agile/Scrum, Performance Optimization, Cross-Browser Compatibility.

CAREER BREAK (May 2025 – Present)

Took a planned personal break due to family responsibilities and personal commitments. Continued upgrading frontend development skills and preparing for the next long-term opportunity.

PROFESSIONAL EXPERIENCE

Angular Developer - Aplite Info Solution Pvt Ltd - Indore, MP

April 2019 - May 2025 (Resigned May 2025)

1. Freight Linc:- Wireframe-to-Website Project

- Converted client-provided wireframes into a fully responsive Angular web application
- Implemented UI using Angular, HTML, CSS, Bootstrap, and Angular CLI
- Ensured pixel-perfect design implementation and cross-browser compatibility
- Improved UI delivery speed and accuracy by ~100%.

2. Ucodia:- Client Support Project

- Joined the project during **mid-production phase** to resolve critical UI and performance issues
- Troubleshoot and fixed production bugs in existing Angular codebase
- Delivered fixes within tight deadlines, **reducing bug tickets by 40%**
- Enhanced overall application stability and improved client satisfaction

3. EyeOnTask:- Company Flagship Product – Continuous Enhancements

- Continuously enhanced core product since 2019, building modular features, improving performance, and maintaining code architecture across Angular versions.
- Designed and implemented over 20 dynamic and reusable Angular components, modules and services for the company's flagship product using Angular v6→v18.
- Built dynamic templates and leveraged RxJS for state management, increasing application responsiveness and maintainability.
- Integrated frontend with RESTful APIs, boosting API interaction efficiency and reducing latency using optimized HTTP services.
- Collaborated within an Agile/Scrum team, participating in sprint planning, standups, code reviews, and retrospectives to deliver projects on time.
- Mentored junior developers on Angular best practices and components architecture, elevating team skill level and code quality.

Education Details

BE: Computer Science

2018

Mahakal Institute of Technology & Management Ujjain MP

SSC: Mathematics

2013

Govt. Boys Higher Secondary School Agar Malwa

High School

2011

Govt. Boys High Secondary School Agar Malwa
